

Precision Moulding of luxury high performance materials

High-Qualitative features

Lightweight

Outstanding specific strength

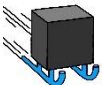

High temperature resistance

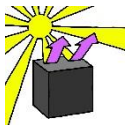

Chemical and corrosion resistance

Functions integration with complex 3D shapes

Excellent tribological and abrasion properties

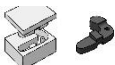

UV-stable

Bio-compatible, hypo-allergenic

Swiss made

Net shape moulded part

Automated manufacturing

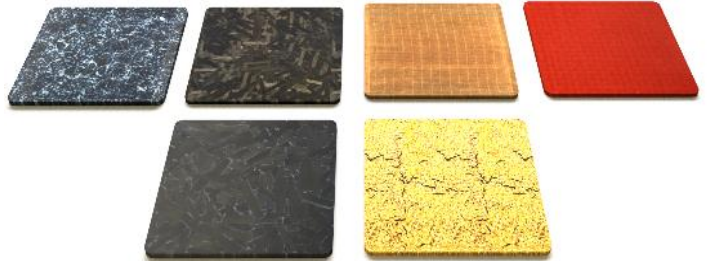

Cost effective process

High performance materials, carbon, gold, PEEK...

Explore infinite material possibilities

Innumerable composite constituents, PEEK or amorphous resins carbon or natural fibres, gold treatment...

Shape it into Haute Horlogerie parts

Prototyping (10 parts), medium batch production (100 parts) up to industrial production (10'000 parts) ...

Get unique design for your watches

Legacy© is a proven technology for the production of bezels, cases, strap links, dials and backs
